Hello Sir,

Greetings!!!

I am Avadhut Pandurang Chandole, I am from the small city Sangamner located in Maharashtra state. I have completed my B.Tech in Mechanical Engineering in the year 2019 with First Class Distinction from Pune University. Currently I have been working with TCS as a System Engineer since last 2 years. My strengths are - I can do any work with responsibility whenever it is needed. Also, I am a hardworking and a passionate person.

My short-term goal is to get a job in a reputed company as a developer. My long-term goal is to get a good position in the organization where I can build my career and help the organization with everything that I have.

Coming to my family - My family has four members including me, my parent and a younger brother. My parents are Teachers. My hobbies are – playing cricket, travelling, riding bike, learning foreign languages.

That's all about myself.
Thank you for giving me this opportunity.

Talking about this course, for me learning continuously is a key to success. I love to learn new things and challenge myself with new challenges.
As I mentioned I am from a mechanical background and currently working in a TCS as a support engineer. I am technically not expert in the development field. Hence to overcome this point I joined this course. I found EDYODA such a beautiful place to propel my carrier as a Developer in coming future.

The reason I joined EDYODA -To learn different technologies used in the Full stack development that are in demand in the MNC's. Also, to start my new journey as developer and to claim a good job in MNC with a good package.

Thank You.
